

# Downs Mix Urea

## Feeding Guide

**Downs Mix 5% Urea** is a low urea, high protein meal content supplement suitable for feeding to weaner cattle and growing/adult sheep in good quality downs or brigalow country. This mix will ensure continued growth during the dry and will correct known mineral deficiencies in those country types. Daily intake 200-300 grams per day for weaner cattle and 30-80 grams per day for sheep.

**Downs Mix 10% Urea** is a medium urea, high protein meal content supplement suitable for feeding to backrunner and adult cattle in good quality downs or brigalow country. This mix will ensure continued growth during the dry and will correct known mineral deficiencies in those country types. Daily intake 250-350 grams per day for cattle. [This mix is not suitable for sheep.](#)
